1919 SPRING PRICE LIST

Hitchcock's : Nursery
Agawam : Massachusetts

To reach the Nursery from Springfield, Mass., take a West Springfield, Feeding Hills or Hartford Westside Trolley Car to Agawam Bridge, Six Cent Fare, Three Minutes Walk from Bridge : :

Commonwealth of Massachusetts

State Board of Agriculture

Official Certificate No. 32

BOSTON, Aug. 31, 1918

To whom it may concern:

This is to certify that I have this 31st day of Aug. completed the inspection of the nursery stock of *E. M. Hitchcock*, grown at *Agawam*, State of Massachusetts, and find it to be apparently free from all injurious insects and diseases which might be transferred on nursery stock from the nursery to the orchard or garden. This certificate is good until July 1, 1919.

(Signed) *H. L. Fernald, Inspector*
Inspected by M. C. Lane.

TO OUR CUSTOMERS

In presenting this, our 24th Annual Price List, we wish to extend our sincere thanks to our old customers especially, many of which have bought plants of us every year since starting in the business.

To prospective new ones we wish to say, please give us a trial. We will do our best to please you. Our sales of plants increase steadily from year to year with very little advertising.

We buy no plants to sell. We buy new varieties for our own planting only. We buy from introducers only.

We give our personal supervision to digging and packing all orders sent us.

We warrant our plants to be equal to any, no matter where or by whom grown. In making this statement we know what we are talking about, as we have received plants from almost every nursery in the states.

Claims, if any, must be made upon receipt of goods; when they will be cheerfully and carefully examined, and if our fault will be settled promptly and satisfactorily.

We could print hundreds of testimonials as to packing and quality of stock, but do not think it would warrant expense.

We respectfully solicit a share of your patronage for 1919.

E. M. HITCHCOCK.

Agawam, Mass.

SPECIAL NOTICE

Terms. Cash or one-half cash with order; balance before shipment.

Agawam, Mass., is our Postoffice address.

Springfield, Mass., is our Express and Freight Office.

Money Orders. Please make all Postoffice and Express Money Orders on Springfield, Mass.

Boxing and Packing is done Free and everything is labeled.

All stock guaranteed True to Label.

SHIPPING

By Express. We advise shipping plants and roots by express, especially in lots of 500 and over as we know by experience they are received in much better condition and with the recent reduction in express rates about as cheaply.

By Freight. We do not advise shipping by freight, but will if customers wish.

By Mail. Customers wanting plants and roots sent by mail must add at the rate of 5c per dozen. Larger quantities must go at Parcel Post rates, which are as follows:—

From Springfield, Mass., Local, 10 cents per 100; First and Second Zones, up to 150 miles, 15 cents per 100. Third Zone, up to 300 miles, 20 cents per 100. Fourth Zone, up to 600 miles, 25 cents per 100.

STRAWBERRIES

Strawberries marked (P) are Pistillate or imperfect, and must have every third or fourth row planted with varieties marked (S), which are stamineate, or perfect.

We will furnish 50 of a single variety at 100 rates and 500 of a single variety at 1,000 rates.

Those wanting 10,000 plants or over, write for special price.

For Fall planting we expect to have plants of the different varieties ready about Sept. 1. Price \$1.00 per 100 for all Standard Varieties.

ASPARAGUS

Extra Strong, 1-Year Roots

We have a few hundred roots only of the New Palmetto variety at \$1.00 per 100.

RHUBARB

Strong, 2-Year Roots

Price, 10c each. \$1.00 per 12.

STRAWBERRIES

About Varieties

For the spring of 1919 we are offering two new varieties. Both are very promising as to vigor of plant and growth. Big claims are made for both by the introducers as to size, quality and productivness. Perfect blossoms. The **Messenger** and the **Howard**. We are offering both as long as stock lasts at 25c per doz. and \$1.00 per 100.

After another season's fruiting I am more than ever convinced that we should stick to the well tested kinds for our main planting. Still I would not condemn all new varieties but each year test the most promising of the new ones on a small scale on one's own ground. By so doing we will be in a position to decide on their value to us without much expense.

In standard varieties the **Fairfield** is still the best extra early both for home use and market.

The Early and Medium and the Medium to Late varieties are all either good for home use or market.

We do not think it necessary to go into a lenghty description of standard varieties but will say they are all good paying varieties.

STRAWBERRIES

About Varieties

Fall Bearing Varieties

✓ **Superb—S.** This is the only fall bearer we consider worth planting and we have tested about every variety as fast as introduced. If you want nice, large, good flavored berries and lots of them in the fall, then plant the Superb in the spring. Keep all blossoms and fruit stems picked as fast as they appear until about July 1. Then you will have all the strawberries you want until frost comes.

The Superb will ripen fruit from early in June until frost if blossoms are not removed, but your crop will not be so satisfactory and but few will ripen at one time.

Standard Varieties

Uncle Jim. For a large, fancy berry for the home garden there is nothing in sight to compare with the Uncle Jim. Extra large, extra quality, extra good grower and productive. Not as firm as some but will pay well for near market.

Wm. Belt. Considered by many to be the best flavored berry grown. Very large fancy berries and productive.

The Heritage is the best late berry we ever fruited either for home use or market. This is the berry that topped the Springfield market again in 1918 averaging close to 30c per quart basket wholesale. Unfortunately our stock of plants of this variety is comparatively small this season. Order early.

STRAWBERRIES

About Varieties, continued

The Parsons Beauty, Pocomoke, and Gibson are much alike with us. All three are good paying varieties for market but rather tart for home use.

Paul Jones. After six years fruiting we shall plant this variety in place of the Haviland this spring. The Paul Jones is just as good quality and much better in all other respects. We shall discard the Haviland and also the Brandywine; using the Heritage in place of Brandywine.

Campbell's Early. Although this is not a new strawberry, yet it has been on the market only a few years. We were induced to plant it last spring by a friend who claims it is the best extra early variety, bar noon. We have a few hundred plants to offer this spring at 25c per doz. \$1.00 per 100.

Our planting for market the coming season will consist largely of Abington, Paul Jones, Parsons Beauty, Sample and Heritage.

For home use Fairfield, Sen. Dunlap; Wm. Belt, Uncle Jim, Minute Man and Heritage.

STRAWBERRIES

Planting and Cultivation

All varieties of the Strawberry give the greatest yield and the largest berries when grown in rich soil; hence no pains should be spared in preparing the bed carefully before planting, by digging or plowing deeply and turning under a liberal application of well rotted manure. Pulverize the surface soil thoroughly with harrow and rake, and if a top dressing of ground bone can be applied, it will be found a great benefit at fruiting time. Select a location where the soil is moist and deep if possible—moist and yet where water does not stand near or upon the surface. In such a soil well enriched, Strawberries delight and give marvelous results. They will, however, succeed upon any soil if well manured. Strawberries do not succeed when planted in shady locations; hence, in selecting a plot for them, be careful to avoid places that are shaded by trees. For hill culture in the family garden: set plants in rows two feet apart and the plants fifteen inches apart in the rows; or if to be worked with horse and cultivator, have the rows three feet and the plants one foot apart in the row. In either case cut off the runners as they appear. If to be grown in matted rows, plant three and one-half or four feet apart and the plants a foot apart in the rows, permitting the runners to grow at will. The after culture consists in keeping the soil mellow and free from weeds by frequent hoeing and cultivation. The Planet Jr., twelve tooth cultivator is a very good tool for this purpose. If you live in the Northern state, where you are subject to severe freezes, I would advise you to mulch your plants. At the approach of winter (as soon as the ground is frozen sufficiently to support the weight of a horse and cart) cover the entire bed with straw or other loose light material. Light strawy manure is excellent for this purpose, as the soluble portion leaches into the soil and affords nourishment to the plants, while the fibrous portion remains upon the surface as a mulch. Evergreen branches are very useful for holding the mulch in place and are of themselves a protection. When the plants start growth in the spring, rake the mulch from off the plants suffi-

ently to permit them to push through it, and leave it on the surface about the plants to protect the fruit and keep it clean and also keep the soil moist and cool. An application of unleached wood ashes or muriate of potash along the rows very early in the spring, just before a rainfall, will be found to increase the size, beauty and flavor of the berries.

Culture of Asparagus

The months of April, May and June is the best time to plant. Success depends more on condition and preparation of land than it does on the variety. Select well drained, rich soil. If not rich by previous manuring, make it so by plowing in a heavy coat of stable manure or any kind of manure that will make the soil rich. Plow deeply and harrow thoroughly. Mark out furrows four feet apart and set the roots two feet apart in the row. The crowns should be from five to eight inches deep, depending on the soil; the lighter the soil the deeper they should be planted. Cover the crowns with two inches of soil and fill in the furrow gradually through the season as the new shoots grow. Keep the bed free from grass and weeds throughout the growing season and when tops die mow and burn. When convenient give the bed a good coat of stable manure or commercial fertilizer to be cultivated or dug in the next spring. Cut for use or market when shoots come large enough. Beds if well cared for, will last from fifteen to twenty years. For gardens, roots may be planted much closer.

SHIPPING SEASON

Our digging and shipping season for Strawberries begin about April 1st, extending to June, also September and October.

For Asparagus, April 1st to July 1st.

OUR STOCK OF PLANTS

For the Spring of 1919 our stock of plants is not as large as usual, but we will have the quality and grown under the same conditions as usual. Last spring we reduced our acreage of berry plants for other crops to help feed the allies and our boys over there. This spring if we can get the help we will plant our usual acreage to Strawberry Plants.

We would esteem it a favor if customers would state in their orders whether we shall substitute something just as good or better than the varieties ordered, especially when ordering after May 1st.

Yours for a successful season,

E. M. HITCHCOCK, Agawam, Mass.
